

1001 Math Problems

The Toothpick Perimeter Problem

Ginger made a rectangle out of 12 toothpicks.

She noticed that if each toothpick represents a unit of length, then the rectangle has a perimeter of 12 units and an area of 8 square units.

Ginger makes lots of different polygons, all with the same 12 toothpicks.

Question:

What is the smallest area that Ginger can make with a perimeter of 12 units? What is the largest area? (She is interested in whole-number measurements only.)
