

# Shifting Ground: The Changing Agricultural Soils of China and Indonesia (MIT Press)

## Energy inertia

The transition from wood ("traditional biofuels") to fossil fuels—first coal, then oil and natural gas—took more than a century. Today, fossil energy is dominant, with wind and solar making up a mere sliver of the mix. The pace of past energy transitions suggests that a full-scale shift to renewables will be slow.

● Wind and solar electricity ● Hydroelectricity ● Traditional biofuels ● Nuclear electricity ● Modern biofuels  
● Coal ● Crude oil ● Natural gas

Shifting Ground: The Changing Agricultural Soils of China and Indonesia. Front Cover Peter H. Lindert. MIT Press, Oct 12, - Science - pages. Shifting Ground: The Changing Agricultural Soils of China and Indonesia. Front Cover. Peter H. Lindert. MIT Press, Oct 12, - Science - pages. NET (June ). Peter H. Lindert, Shifting Ground: The Changing Agricultural Soils of China. and Indonesia. Cambridge, MA: MIT Press, xii + pp. Shifting Ground. The Changing Agricultural Soils of China and. Indonesia.
